	Hibernia			0.4	14.3	0.5	16.5	0.5	18.7	

¹ "Estimated Ultimate Recovery (EUR)" are those quantities of petroleum estimaed, as of a given date, to be recoverable (Reserves) plus those quantities that have been already produced.

² "Contingent Resources" are volumes of hydrocarbons assessed to be technically recoverable that have not been delineated and have unknown economic viability. Gas, NGLs, and oil in not approved pools/undeveloped fields are currently classified as resources.

³ Produced EUR also include a small quantity of natural gas liquids.

^{4 &}quot;Reserves" are those remaining quantities of petroleum anticipated to be commercially recoverable under a development plan to known accumulations fom a given date.

^{*} NGL estimates have not been calculated

^{*}Reference Document for definitions: Petroleum Resources Management System (PRMS) 2018.
